

PDPA

Collection Personal Data

- notification of purpose of use and disclosing of personal data
- collection and use of data only within the scope of consent
- collection and use of data only within reasonable and appropriate bounds

Care of Personal Data

- ensure data is accurate if used or transferred
- make reasonable protections for data within your possession
- stop keeping personal data once it is no longer needed
- data transferred overseas to be kept with same standard as PDPA

Individual autonomy over personal data

- individuals to be provided access to their personal data and how it has been used and disclosed within a year
- notification of data breach to all affected individuals
- upon request, transfer all data to another organization in a common machine readable format

Backup vs Archive

Backup - a copy of data used to restoration in case of damage / loss

Archive - a copy of data meant for long term storage and reference

Backup	Archive
rapid recovery of live changing data	stores unchanging data for long term retention
multiple copies	one copy
restore speed is crucial	Non important restoration speed
short term	long term
overwritten	immutable

Misc

Version control:

- ease of collaboration

- better visibility of development pipeline
- ability to rollback or retrieve previous iterations
- more readily demonstrate compliance and auditing

Reasons for Naming Conventions:

- re-readability of code
- shared guidelines and standards

Data Privacy - to only access access to authorised parties

- how is data shared with third parties
- how is data collected / storedreadability
- Regulatory restrictions
